just press " X " to move.. No instructions, no nothing. My♥♥♥♥♥♥♥♥stuck in the microwave.. Steamulator. Controls are unclear to say the least, handling is awful, and to top it all off, there's no settings whatsoever! NEVER buy this game!. I may be a little biased because I've never really been a fan of racing games but I know a poorly made game when I see one and god is this one of them. The graphics are subpar and the game doesn't even do anything to make up for that, it's just your typical bare bones racing game. For some reason they felt the need to not have standard controls and don't have a tutorial or even a place on the menu to tell you what the controls are or how the game works. Your car also seems to just blow up randomly I'm still not sure why.

Don't even waste your time on this game even if you enjoy racing.. Ampersand.....oh god.

I cannot say this game is even worth \$.14. I bought it as a gag, just something to♥♥♥♥♥♥♥♥around with and laugh at. I cannot even do that from the amount of times the game itself has froze and glitched on me.

This game does not give you any sort of explanation for the controls, but as soon as it the game starts up, it asks you for your gamejolt login. Seeing that, I already assumed I'd be using either the z or x keys. Sure enough, I did.

X - gas

Arrow keys - steer

Absolutly lovely controls for a racing game, I know.

Between the awful controls and annoying glitches, this game is definitely isn't worth the money, even for how cheap it is.

F-zero meets Megarace but then slowpaced

. Some games come with a tutorial to teach you how to play the game. Others do not. This is one that does not. Paid 14 cents in hopes I could sell the trading cards for a balance of 0 spent.

Audio stopped playing randomly through a racing track.

No tutorial. Spent about a minute at starting line trying to find the button.

Non-existent menu. Just goes straight to game.

No indicator of how to get new vehicles.

Just no.. Impressive.. Hooray for mobile ports that forget to PORT the controls.

THis game sucks.

<https://www.youtube.com/watch?v=1OvJtDXxI4o>. I thought it was a game, but it's a PowerPoint, and a bad one.

Didn't like the presentation.
